

A few things to note about the 2010 Rally Competitor results which follow:

- 1) Only the top three names are indicated on the placement lists – the remainder of the competitors are only indicated by their competitor #. Our reason for this is that we have had reports of some supervisors disciplining competitors when they have not placed well. The competitors have had their written tests and scoring sheets returned to them and can view their results using their competitor #. We realize this is not the perfect solution and if you have any suggestions on how we can improve the process please let us know.
- 2) We do a double check of all scoring after the Rally and unfortunately this year we found a discrepancy in one of the written tests which resulted in a placement change. The change resulted in Christian Chiapetta of Summit Logistics placing third in the Reach Truck division. We will be presenting Christian with a 3rd Place plaque and awarding him \$100. We will be taking steps to ensure this does not reoccur in future events.
- 3) If you are not sure of how the scoring is tabulated, it is (# of wrong on the written test) + (the course time multiplied by 3) + (the course demerit points) = Overall Score.

For example if I had 3 wrong on my test, a course time of 4 minutes and 24 demerit points, my score would be $3 + (4 \times 3 = 12) + 24$ or 39 total points. As in golf, the lowest score wins.

- 4) The score indicated on the written tests is the number incorrect as that is the number we use to calculate the score. So if someone gets their test back and it says 3 – that is the number of incorrect answers and the number we use to calculate the placement (again lowest score wins).
